

3.1 ENVIRONMENT POLICY

The MANSON Group Ltd recognises the impact of our sheetfed printing business on both the local and global environment and we will manage this impact while continuing to produce products that satisfies our customer's requirements.

The Directors and staff are committed to meeting all applicable environmental legislation.

These goals are consistently achieved by our total commitment to continual improvement in environmental management and the prevention of pollution.

We will continue to develop operational procedures, review environmental objectives and targets by limiting emissions and discharges, reducing waste through recycling or reuse where possible, and ensuring the safe disposal of other materials.

We will make continuous efforts to minimise both energy consumption and the use of materials harmful to the environment.

The environmental management system will be maintained by a regular series of internal audits, an annual management review in which objectives and targets are established, and independent external audits by recognised bodies.

The company also subscribes to FSC and PEFC and the Directors and staff are committed to meeting all applicable requirements.

We will provide the necessary training and will ensure that all employees are aware of environmental issues and responsibility and will make the policy available to the public via our website or on request.
